On January 22, 2003, SBC representatives met with Christopher Libertelli, Chairman Powell's Legal Advisor regarding the above-listed proceedings. Participating on behalf of SBC were Chris Rice (Senior Vice President – Network Planning and Engineering), Jim Smith (Senior Vice President - FCC) and Dorothy Attwood (Senior Vice President – Federal Regulatory Strategy & Integration). SBC representatives explained that residential customers can profitably be served using unbundled loops and CLEC-provided switching, that requesting carriers must provide a significant amount of local traffic in order to convert special access services to unbundled loop / transport combinations and the negative impacts of subjecting broadband investment to unbundling obligations. SBC's comments were consistent with its filed materials in the record of these proceedings and no written materials were used during the meeting.

Pursuant to Section 1.1206(b) of the Commission's rules, this *ex parte* is being electronically filed. I ask that this *ex parte* be recognized with the proceedings identified above.

Please call me should you have any questions.

Sincerely,
